## Subject - Social Studies

### Lesson –Origin and Formation of Society

#### 1. Study the following text and answer the following questions:

The society has been progressing since its origin. The progress has been slow and has taken a long time to shape. There are different stages of development of society. They are as follows:

- a. Hunting Age/Stone Age
  - b. Animal Rearing Age
  - c. Agricultural Age
  - d. Industrial Age
  - e. Age of Science and Technology
- a. **Industrial Age:** Development continued and men discovered some metals which were used to make better tools for agriculture. B this time, the human mind had developed to a great extent and they started to manufacture different goods they needed. Thus, industry also developed along with agriculture. Due to the establishment of industry, people got job opportunities.
- b. **Age of Science and Technology:** Now we are in the modern age. It is the age of science and technology. Many scientific discoveries and inventions such as radio, television, computer, aeroplane, internet, etc. have been made which has made our life easier. The development of transportation and communication has brought the people of the world closer. We can reach any part of the world within a short period of time. We can watch the incident taking place in any part of the world sitting in our room. Life has become easier now than it was in the past. Due to the advancement of computer, development of information and communication, the present time is called the age of computer, the age of science and technology and the space age. Present society has become service oriented. Every aspect of our life is influenced by the development of the science and technology. People are getting service easier and faster in the field of transportation, communication, agriculture, health, education, etc. The pace and quantity of work is increasing due to the use of Robots and computers.
