Assignment-2077

(Bhadra 08, 2077, Monday)

Class: Six

Subject- English

Read the passage below and do as instructed.

A symbol is something stands as a reminder of something else. The United States has many national symbols that help bring the local and regional communities together as a whole nation. By having some traditional symbols that people throughout the United States share, they are able to connect with each other and share the pride they have in their country. The United States flag is a symbol that is easy for all Americans to recognize. It stands for their country, with one star for each of their 50 states, and 13 stripes to represent each of their original 13 colonies. Those colonies later became states, and 37 more states joined them to make up their country. The Americal Bald Eagle is the national bird. It was chosen because it is so independent and free. Choosing such a bird to represent the nation tells everyone that their country values freedom and the courage to be independent. The Statue of Liberty is another very famous American symbol. It was a gift to the people of America from the people of France in 1885. It represented not only the spirit of friendship between their countries, but also the shared vision for liberty, which is a synonym for freedom. America's symbols unite people from many different states and help them feel like Americans instead of just citizens of their own states. They all pledge allegiance to the same flag. They celebrate national holidays. American spirit shows more than ever when they unite in times of crisis, reaching out to help fellow Americans, or foreigners in need.

A. Answer these questions.

- a. What is a symbol?
- b. What do many national symbols of America help bring?
- c. What does the American flag stand for?
- d. What did the statue of liberty represent?
