Assignment-2077

(Jestha 29, 2077, Thursday)

Class: Seven

विषय - नेपाली

Subject- Mathematics

1. a) From the marks given below obtained by 20 students of class 7 in mathematics, construct a frequency distribution table with tally marks.

14, 16, 18, 12, 14, 15, 10, 14, 12, 18,
15, 14, 14, 15, 16, 12, 14, 15, 15, 12

b) Daily wages (in Rs) of 30 workers in a factory are given below. Arrange the data in proper order. Construct a frequency table to present the data.

85, 90, 60, 75, 80, 75, 60, 90, 80, 75,
70, 80, 75, 60, 75, 80, 90, 85, 75, 70,
80, 75, 70, 80, 85, 75, 80, 75, 70, 75.

c) In an interview of 20 married couples about their desired number of children, the responses were as follows:

3, 2, 1, 2, 2, 1, 4, 3, 2, 1
2, 3, 1, 2, 4, 2, 1, 3, 2, 1

Present the above data in a frequency table using tally marks and answer the following questions.

- How many couples desired a single child?
- How many couples desired two children?
- How many couples desired three children?
- How many couples desired more than three children?
- What is the desirable number of children for the maximum number of couples?

Subject- Social Studies

Lesson -Communication

A. Study the slide posted in Google Classroom and answer the following questions:

- Introduce communication in your own words.
- Why do you think communication is important?
- What are the means of communication? How the modern means of communication have transformed the world?
- 'Radio and television are the effective means of communication.' Justify.

The End.
