## **Assignment-2077**

**(Jestha 11, 2077, Sunday)**

**Class: Five**

### **Subject -Social Studies**

#### **National Heritage**

Taplejung, 2nd Bhadra.

Planting the saplings of trees on the barren hill in Funcling Rural Municipality has just been completed. The children of local primary school and the members of the youth club planted over 200 saplings. When they grow into trees, there won't be any problem of fodder for animals and firewood for the locals. Close to Bhima's house, there is a park. A temple stands in the park. Near to that, there is also an open field and a pond. Recently, the villagers connected a road to the park. While making the road, they took every care not to destroy the jungle natural resources. They planted trees on either side of the road. While making road, Bhima helped the villagers by feeding them water. Nowadays, people from many places come to the park for social gathering. The road has made it easy for the locals to go to the nearby community forest to collect fodder for their animals, wood for building purpose, firewood, herbs, etc. The farmers water their fields through a canal from the river. The water of the river is also used to run the mill and generate electricity. Bhima and her friends always help in cleaning the river. They do not throw plastic, stone, bottles etc into the river. They clean the park at regular intervals.

#### **Activities**

1. Make a list of any 5 national heritages of our country.
2. What are the advantages of conserving our national heritages like roads and streets, rivers, forests, wells, parks, religious places, etc? Write a letter to your friend explaining them.
4. Point out the bad effects of neglecting our national heritages.

### **Subject - Science**

1. Differentiate between oviparous and viviparous animals.
2. Differentiate between amphibia and reptilian.

### **विषय – नेपाली**

**कक्षा ५ (मेरो नेपाली किताब )**

**पाठ २ कुविचार**
