Assignment-2077

(Jestha 11, 2077, Sunday)

Class: Six

Subject - Mathematics

1. In an interview of 20 married couples about their desired number of children, the responses were as follows:

2 1 3 2 2 1 2 3 4 3
2 1 1 2 1 2 3 2 1 2

Present the above data in a frequency table by using tally marks and answer the following questions.

- How many couples desired only one child?
- How many couples desired two children?
- How many couples desired three children?
- What is the desirable number of children for the maximum number of couple?

Subject: Science

- What is simple machine?
- What are the types of simple machine?
- What is inclined plane? Give examples.
- What is lever? Give examples.
- What is fulcrum?

Subject- English

Open the given link and study it carefully and do exercise I and exercise II (a, b) given there.
