

Class: Four

Subject-English

Starter

Let us read a few interesting facts about ostriches.

- An adult ostrich is 7–10 feet tall. It weighs 100–160 kgs.
- Ostriches are large, flightless birds. They live in the dry, hot savannas and woodlands in Africa.
- They can run at the speed of 70 kms per hour.
- Ostriches fight with their legs. They kick forward because that's the direction in which their legs bend. Each two-toed foot has a long, sharp claw. A solid kick can kill a lion.

Now, try to complete a few facts by yourself.

1. Ostriches are the world's living birds.
2. Ostriches have stomachs.
3. An ostrich egg is the of any living bird's egg.

Subject - Social Studies

Answer the following questions:
