## Comprehension

### The Owl and the Sparrow

An owl and a sparrow live in a tree. The sparrow lives in its nest. The owl lives in a hole in the trunk of the tree. Every morning, the sparrow flies out to look for food for its babies.

One morning a cat comes and hides behind a bush near the tree. The cat wants to eat the baby sparrows. The cat waits for the sparrow to fly away.

After the sparrow flies off, the cat comes out from behind the bush. The owl sees the cat from its hole. The cat does not see the owl and begins to climb the tree trunk.

When the cat reaches the hole, the owl pokes it with its strong beak. The cat falls off the tree trunk. Then the owl flies out of its hole and chases the cat away.

Just then the sparrow comes back and sees the owl and the cat. The sparrow looks at the nest. The baby sparrows are safe in the nest. The sparrow says 'Cheep! Cheep!' and thanks the owl. The sparrow and the owl become good friends.
